

Installing NEURON

Windows: download and run the installer from
<https://nrn.readthedocs.io/>

Linux and macOS: open a terminal and execute
`pip3 install neuron`

macOS users might also need to:

1. install the command line tools. From a terminal:
`xcode-select --install`
2. install xquartz. Use the dmg from xquartz.org
After installing, log out, then log back in.
